

How can I report spam?

Here's how can you can report spam messages:

1. If you're connected via IMAP on an email client, you can drag and drop spam messages (or move them) into the 'Spam' folder.
2. If you're connected via POP on an email client, users can forward spam to 'isspam@meganet.net'.
3. Webmail users can click on the 'Spam' toggle, shown below:

Reporting spam can improve the overall spam scanning capability of the server, improving the email experience for all users.
