Domain Names

How can I register a domain name through you?

We're happy to help register a domain name on your behalf. When you purchase a domain through Meganet, we handle all aspects of the process. We'll even manage your DNS for you.

When the time comes for renewal, we'll handle that as well (domains through us are renewed on a two-year basis).

You can register a domain name through Meganet by...

1. Contacting us by phone. You'll be asked which domain you would like to register, and we'll take care of it, if it's available.
2. If you're an existing customer, you can email in your request, specifying the amount of years you would like to register the domain for.

As always, give us a call if you need assistance.
