

Email

Which email clients do you support?

Meganet supports a wide variety of email clients. Some of the most popular we support are:

- Microsoft Outlook
- Apple Mail
- Mozilla Thunderbird

Additionally, we also support mobile email clients, such as the default mail apps you would find on an Apple or Android mobile device.

Please note, support for third party email clients is **limited**. Because these programs are not developed and updated by Meganet, we do not have any control over glitches and other bugs that may prevent you from collecting your email.

We highly recommend that customers use the Meganet website to check their email.
