Email

What are your mail server settings?

If your email address ends in @meganet.net, @naisp.net, @xpres.net:

Standard:

Incoming mail server: mail.meganet.net
Incoming mail server port: 110 for **POP3** or 143 for **IMAP** ([What's the difference?](#))
Username: youraddress@meganet.net (you MUST use @meganet.net, even if you have @naisp.net or @xpres.net as your email).

Outgoing mail server: mail.meganet.net
Outgoing mail server port: 587 for SMTP
Username: youraddress@meganet.net* (you MUST use @meganet.net, even if you have @naisp.net or @xpres.net as your email).

*Your username and password is required for the outgoing SMTP server (some programs will say it is optional).

Secure (SSL/TLS):

Incoming mail server: mail.meganet.net
Incoming mail server port: 995 for **POP3** or 993 for **IMAP** ([What's the difference?](#))
Username: youraddress@meganet.net (you MUST use @meganet.net, even if you have @naisp.net or @xpres.net as your email).

Outgoing mail server: mail.meganet.net
Outgoing mail server port: 465 for SMTP
Username: youraddress@meganet.net* (you MUST use @meganet.net, even if you have @naisp.net or @xpres.net as your email).

*Your username and password is required for the outgoing SMTP server (some programs will say it is optional).
