

Email

How can I change the look of my Meganet webmail?

Changing the look of your webmail is simple. Once logged in, look for **Theme** at the bottom of the folder pane:

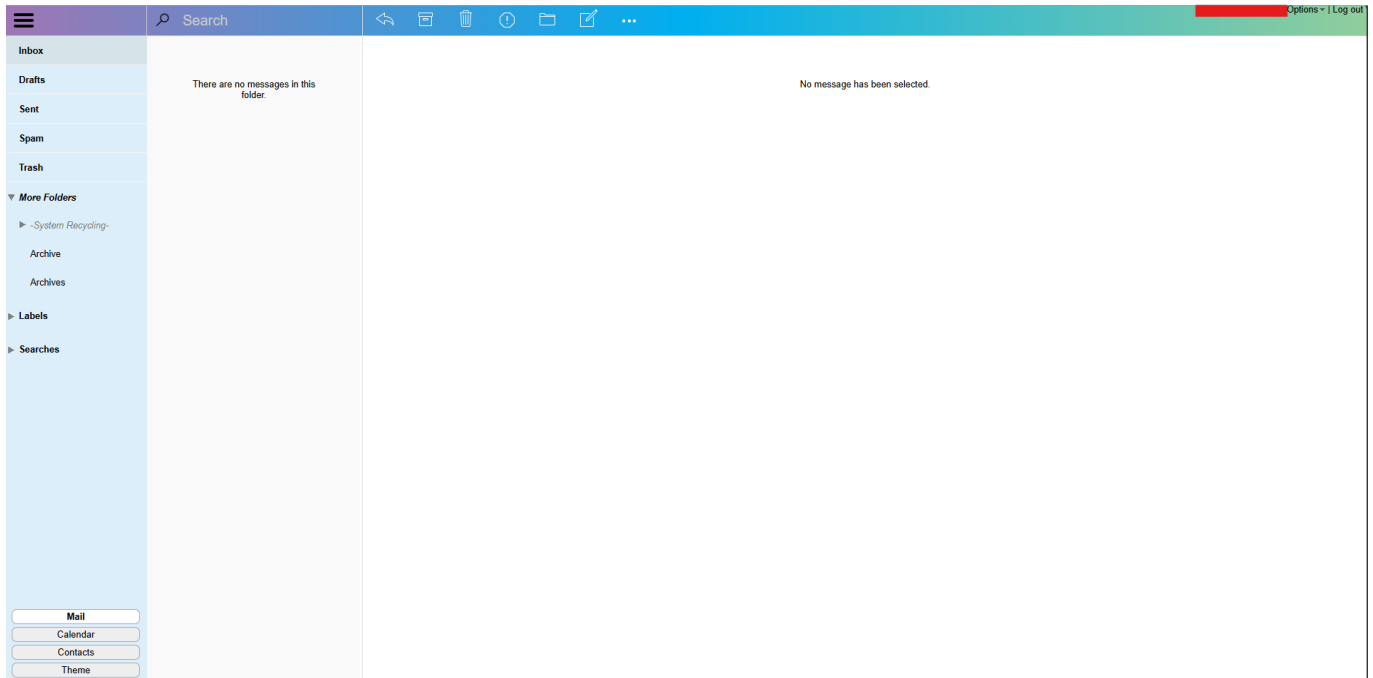

Once selected, the following interface will open from the bottom of the screen:

A number of options are available here. Beginning with layout, you will have the additional option of displaying a **Clean** interface, which looks like this:

Email

Additionally, you will have the option to display message in **Widescreen** (displays the messages and message contents in two separate columns) or **Tallscreen**, which displays messages in two rows.

Finally, the option is also available to customize the general spacing of items, from Compact to Spacious.
