

Email

Mail Server Settings in Apple Mail

- Open **Apple Mail** and go to **Mail > Preferences**.
- Select the **Accounts** tab and choose the email account you want to update.
- Click the **Server Settings** tab.
- Under **Username**, ensure it reads "myusername@meganet.net" for both **Incoming** and **Outgoing** mail servers (append "@meganet.net" if it's missing).
- For both **Incoming** and **Outgoing** mail, ensure the server settings are:
 - **Incoming (IMAP or POP3):** mail.meganet.net
 - **Outgoing (SMTP):** smtp.meganet.net
- Click **OK** to save your changes.
