

Email

Mail Server Settings in Mozilla Thunderbird

- Open **Thunderbird**.
- Click the **Menu** button (three horizontal lines) and select **Account Settings**.
- Choose your email account from the list on the left.
- Under **Server Settings**, check your **Username**:
 - If it's "myusername," change it to "myusername@meganet.net" for the **Incoming** server.
- Scroll down to **Outgoing Server (SMTP)** and click **Edit**.
- Under **Username**, ensure it reads "myusername@meganet.net" (append "@meganet.net" if it's missing).
- Ensure your **Outgoing SMTP server** is set to: smtp.meganet.net.
- Click **OK** to save your changes.
