

Email

Mail Server Settings on iOS (iPhone, iPad) Mail

- Open **Settings** on your iPhone or iPad.
- Scroll down and tap **Mail**, then **Accounts**.
- Select your email account, then tap **Account** again.
- Under **Username**, make sure your username reads "[myusername@meganet.net](#)" (if not, append "@meganet.net"). This applies to both **Incoming** and **Outgoing** mail servers.
- Tap **Outgoing Mail Server (SMTP)**:
 - Tap the **Primary Server**.
 - Check the **Username** field and append "@meganet.net" if necessary.
 - Ensure the **Outgoing server** is set to: smtp.meganet.net.
- Go back and tap **Advanced** under **Incoming Settings**:
 - Ensure the **Incoming Server** is set to: mail.meganet.net.
- Tap **Done** to save changes.
